Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This is the first Office action on the merits of Application No. 10/783,446 filed on February 20, 2004. Claims 1-12 are currently pending.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

The disclosure is objected to because in line 1 of paragraph [0032] "Figs. 11-12" should read - - Figs. 10-12 - -. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "said engagement openings" in line 11. There is insufficient antecedent basis for the plural openings in the claim. It is suggested that in line 9 "opening" be changed to - - openings - -.

Claim 6 recites the limitation "said engagement openings" in line 7. There is insufficient antecedent basis for the plural openings in the claim. It is suggested that in line 5 "opening" be changed to - - openings - -.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Kosumi et al. '269. Figures 7 and 8 show the hub 106 with the ring-shaped body area 12, and the connection arms defined by the edges of recesses 13a. Also note column 11, lines 40-49 which discuss the axial securing function provided by the area of the ring-shaped body adjacent to the contact portions 51 of the plates 8', i.e. the bottom area of the recesses 13a. The cross-hatched portion of the portion 13 of the hub visible in the upper half of Figure 7 corresponds to the connecting section of claims 10 and 11. Further note column 11, lines 40-49 which describe that the friction disks do not contact the connecting section. Kosumi et al. also shows the rotational connection area 11 as in claim 12.

Claims 1-12 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by DE 20302735 U1.

Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

Prior Art Citation

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited by applicant which is listed on the forms PTO-1449 submitted with the Information Disclosure Statements filed on June 14 and August 19, 2004 has been considered. The examiner further cites Hofmann et al. '367, Hofmann et al. '546 and Unsleber et al. '865 which show hubs for friction clutches.
